

# Secure Access in One Tap

Use Yubico to Quickly and Securely Log into Your Zebra Devices

**Tap. Authenticate. Go.**

Eliminate password fatigue and streamline frontline productivity with NFC one-tap authentication. With Yubico security keys, users can instantly and securely log into Zebra mobile computers and tablets — no typing, no shared passwords, no delays.

## Why Yubico + Zebra?

### One-Tap NFC Login

Simply tap your Yubico key to your Zebra device and gain instant access.

### Phishing-Resistant Security

Hardware-based authentication protects against credential theft and unauthorised access.

### Fast User Switching

Perfect for shared devices in retail, logistics, healthcare, and warehousing environments.

### Reduced IT Overhead

Minimise password resets and support tickets while strengthening compliance.

## Built for the Frontline

Yubico’s durable, enterprise-grade security keys are designed to perform in demanding environments — from distribution centres to hospital floors.

When paired with Zebra devices, organisations benefit from:

- Secure workforce mobility
- Seamless authentication workflows
- Enhanced device security posture
- Improved operational efficiency

## The Smart Way to Log In

Modern threats require modern authentication. Replace passwords with secure, tap-and-go access that keeps your teams moving and your data protected.

**One Tap. Zero Compromise.**
